~~EXHIBIT A~~

Central Agency Briefing and Exhibits Center

The Office of Training is preparing an Agency Briefing and Exhibits Center, located near or adjacent to the Agency auditorium, as a part of the space allocation for the new building. The space allocated will accommodate orientation, briefing and exhibit activities for all components.

The center will house exhibits of the various components which may require displays for intragency and intelligence community briefings, employee orientation or instructional programs, including those of the Office of Training. The exhibits will be individually housed at the Office of Training. The exhibits will be individually housed, being arranged so that several single exhibits can be shown separately to small groups, or the entire exhibit can be exposed to a larger group on connected tours. Composition of the exhibits will reflect the requirements of the components. Each office will establish the criteria for, control the use of, and schedule its exhibits.

A portion of the center will be available for the briefing of groups up to 50, and will provide facilities for visual aids which can be used in conjunction with the exhibits.
